

## GI (Galvanized) Steel Flexible Conduit

- Color – SILVER

\* Std. Length = 15 mtr. (Roll)

A well-designed **Double-lock Flexible Conduit**. These Double-lock Flexible Conduits are helically coiled high quality metallic strips with double lock construction. The strip of the Double-lock Flexible Conduit is formed with legs that interlock to form a hose that is flexible and ideally suited for conveying dry bulk. Galvanized Steel Flexible Conduit, which is designed in order to provide mechanical strength and higher flexibility. These helically wound flexible conduits in galvanized steel are appreciated for features such as corrosion resistance, durability, and high functional life.

### **Application Areas:**

- Construction & Buildings
- Telecom & Fiber Optics
- Petro chemicals & refining industries
- Coals & Mining, Defence, Shipping yards & Railways
- Manufacturing units
- Pharmaceuticals
- Bathroom fittings and interiors
- Used as mechanical protection for insulated electrical cables and wires
- Under floor applications for computer/floor boxes
